

INSTALLATION INSTRUCTIONS

MODEL: AIS-X

CAUTION

Before assembling your lighting fixture, refer to the section titled **ELECTRICAL CONNECTIONS**. If you feel you do not have enough electrical wiring experience, refer to a do-it-yourself wiring handbook or have your fixture installed by a qualified licensed electrician.

GENERAL

1. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning
2. All electrical connections must be in accordance with local codes, ordinances, or the National Electrical Code.
3. Before starting installation, disconnect the power by turning off the circuit breaker or by removing the fuse at the fuse box. Turning the power off using the light switch is not sufficient to prevent electrical shock
4. **This fixture is for 12V DC use only.**

UNPACK THE FIXTURE

Check the contents of the box. You should receive:

- Fixture
- Instruction Sheet

TOOLS & MATERIALS REQUIRED

- Screwdriver
- Wire cutters
- Wiring supplies as required by electrical code

ELECTRICAL CONNECTIONS

Required supply circuit: 12V DC

1. Connect white wire(s) from the fixture to the white (neutral) wire of the supply circuit. Connect the black wire(s) from the fixture to the black (live) wire of the supply circuit.
2. When making electrical connection use UL/CSA listed wire connectors suitable for the size, type and number of conductors
3. No loose strands or loose connections should be present. Secure wire connectors with electrical tape (Recommendation Only).

FINAL ASSEMBLY

1. Ensure the electrical connections are secure and the wires are placed properly so that they will not interfere with the mounting holes on the fixture.
2. Remove the lens from the fixture.

3. Connect white wire(s) from the fixture to the white (neutral) wire of the supply circuit. Connect the black wire(s) from the fixture to the black (live) wire of the supply circuit.

4. Install the fixture base to the wall using 4 screws. Mounting the lens to fixture base, ensure the lens and fixture base match up properly.

5. Restore electricity and check the operation of your fixture.

ENVIRONMENTAL PROTECTION

Electrical products must be discarded in an environmentally friendly area.
